## **DETAILED ACTION**

1. This Office Action is in response to applicant's amendment filed 30 April 2004.

Claims 1-4, 6-23 and 26-28 are currently pending in this application. Claims 1-4, and 6
18 were previously allowed. Claims 5, 24, and 25 have been cancelled by applicants.

Amended claims 19-23 and 26-28 have now been allowed over the prior art of record.

## Response to Arguments

2. Applicant's arguments filed on 30 April 2004 have been fully considered and found to be persuasive.

Regarding applicant's response to 112(2) rejections: The examiner withdraws the 112(2) rejection in view of applicant's amendment to claim 19.

Regarding applicant's response to 102/103 prior art prior art rejections:

Applicants have amended independent claims 19 and 20 to distinguish the claimed invention over the prior art of record. (See interview summary dated 26 May 2004)

Accordingly, the examiner withdraws the 102/103 prior art prior rejection of claims 19-23 and 26-28 in view of applicant's amendment to independent claims 19 and 20 and interview summary dated 26 May 2004.

## Allowable Subject Matter

3. Claims 1-4, 6-18,19-23 and 26-28 are allowed over the prior art of record.

The following is an examiners statement of reasons allowance:

Application/Control Number: 09/532,514

Art Unit: 2128

Per claims 1-4, and 6-18: Independent claim 1 uses "means for" language and is given deference in view of In re Donaldson and interpreted in view of 35 U.S.C. § 112 paragraph 6. The "means for" language and the limitations (bus control means and memory control means) related thereto of claim 1 are interpreted within the scope of enablement as provided within the relative embodiment provided within applicant's specification. Specifically, independent claim 1 recites a bus control "means for" and memory control "means for" that are described by the specification in passages beginning on page 10, line 2, and page 14, line 19 respectively. The examiner has therefore interpreted the specific bus control means, memory control means, and associated external terminal connections as specifically disclosed in applicant's specification on page 10, line 2 to page 11, line 10 (bus control), page 11, line 15 to page 12, line 9 (terminal connection), page 14, line 19 to page 15, line 8 (memory control), and page 23, lines 15-27 (memory control). Claims 2-4, and 6-18 are allowable as being dependent from claim 1.

Per claims 19-23 and 26-28: Independent claims 19 and 20 claim limitations relating to an emulation method and microcomputer for executing processor instructions, sending external signals, outputting control signals by a memory controller, connecting processor bus by a bus controller, sharing an emulation memory, and an external terminal connection. This has been disclosed in the prior art. The prior art of record, while disclosing these features does not meet the conditions as suggested in MPEP section 2132, namely:

Application/Control Number: 09/532,514

Art Unit: 2128

"The identical invention must be shown in as complete detail as is contained in the ... claim." Richardson v. Suzuki Motor Co., 868 F.2d 1226, 1236, 9 USPQ2d 1913, 1920 (Fed. Cir. 1989). The elements must be arranged as required by the claim, but this is not an **ipsissimis verbis** test, i.e., identity of terminology is not required. **In re Bond**, 910 F.2d 831, 15 USPQ2d 1566 (Fed. Cir. 1990)."

In particular, the prior art of record does not disclose (see claim 19, for example) features pertaining to the specific operation of the bus controller, memory controller, and associated external terminal connections as specifically disclosed in applicant's specification on page 10, line 2 to page 11, line 10 (bus control), page 11, line 15 to page 12, line 9 (terminal connection), page 14, line 19 to page 15, line 8 (memory control), and page 23, lines 15-27 (memory control), in the context of the claims. (also see interview summary dated 26 May 2004) Claims 21-23, and 26-28 are allowable as being dependent from independent claim 20.

The closest prior art uncovered during examination is:

- U.S. Patent 6,240,377 issued to Kai et al.
- U.S. Patent 5,313,618 issued to Pawlowski
- U.S. Patent 5,623,673 issued to Gephardt et al
- U.S. Patent 4,939,637 issued to Pawlowski

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2128

## Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fred Ferris whose telephone number is 703-305-9670 and whose normal working hours are 8:30am to 5:00pm Monday to Friday.

Any inquiry of a general nature relating to the status of this application should be directed to the group receptionist whose telephone number is 703-305-3900.
